

**SOLUTION FACT SHEET**

**K2P for Hospitals – Cardiovascular Medicine**

*High-value, coordinated care begins with clinicians at the height of competence. When all have the core knowledge and skills, communications become clearer and patient outcomes get better.*

**New Ways to Address Healthcare Challenges**

With healthcare evolving, hospital administrators and department chairs are faced with new challenges, from readmission rates to growing physician burnout. Hospitals have focused on a multitude of initiatives and new processes to address these challenges. But often overlooked is elevating physicians’ ability to keep current with emerging medicine. When physicians stay current in medicine, they have higher confidence, are more able to practice at their best and deliver quality patient centered care.

**Knowledge to Practice (K2P) for Hospitals**

Knowledge to Practice offers cardiology departments a comprehensive solution that enables physicians to keep up with emerging medicine. Our solution helps you provide physicians with a personalized, easy-to-use learning experience that increases knowledge in less time. We work with global thought leaders to distill down the literature in a meaningful, practical manner – enabling physicians to keep pace with change. In addition, the K2P solution offers administrators longitudinal insights across your organization’s competency, local needs assessment and customized curriculum to keep your team at their very best. These invaluable competency insights help improve value-based purchasing and reimbursement.

**74% more learning**  
Increase in knowledge using K2P Adult Learning Theory approach over traditional methods

**76% faster learning**  
Gain the same knowledge in only one-quarter of the time

**► Know Where Your Unit Stands**

The K2P Insight Dashboard (ID) enables hospital leaders by providing:

- View into organization-wide competency levels to identify areas of risk
- Visibility into physician engagement with curriculum to assess initiative impact relative to coding, hospital-acquired infections, and CHF and MI 30-day readmissions

**► Consistent Source of Knowledge**

A common baseline of clinical knowledge for your physicians helps your department to deliver a consistent level of patient care.

- Latest, unbiased content of evidence-based and emerging medicine
- Content by renowned experts from the top academic institutions

**► Learn More in Less Time**

K2P Adult Learning Theory (ALT) approach uses adaptive learning to tailor clinical content to an individual’s needs and areas for improvement.

- Micro-learning modules in multiple media format
- Personalized, competency-based learning plan
- Accessible on any device, anytime, anywhere

# FEATURES

## K2P Insight Dashboard

- Visibility into areas of risk and lack of mastery so you can prioritize and focus your initiatives to improve quality of care
- Data to support need for customized curriculum based on your risk
- Insights into how lack of mastery is impacting care
- Progress towards level of mastery for specific or entire curriculum

## Comprehensive Clinical Content

- CurrentMD™ Cardiology: Practical distillation and application of emerging medicine
- Cardiovascular Updates: Comprehensive core curriculum in general cardiology
- Echocardiography Updates: Comprehensive curriculum in echocardiography

## Service and Support

- Training and setup session for Insight Dashboard and administration
- Periodic analytics and implications meetings
- Regular client success check-ins and learner/admin technical support

## Personalized Learning

- Competency assessment that tailors learning plan for each individual
- Content in short modules proven to maximize learning and minimize time

## Customized curriculum available

- Adult-learning expertise and services to customize content and help disseminate new and changing policy with pace and consistency

"What I'm loving about this dashboard...  
is that I can check improvement."

- M. Martinez, MD

## About K2P

Knowledge to Practice (K2P) is a provider of online competency assessment, clinical content, and analytics solutions that help physicians, hospitals, and healthcare systems to transform patient care, deliver continuity of care, and mitigate risks. With K2P, our clients are able to elevate the knowledge mastery of their clinical teams, improve their practice of medicine with the latest clinical content and learning methods, and improve clinical outcomes.
