# K2P Knowledge to Practice

**SOLUTION FACT SHEET**

## K2P for Training Programs - Cardiovascular Medicine

*Contemporize and transform how you evaluate your trainees' mastery of clinical knowledge and enhance your program curriculum.*

### Keeping Programs at the Forefront

As all 6 domains of competency continue to expand, training programs are challenged to deliver what each trainee needs to be at their best. Having the assets your program needs to meet the learning behaviors of millennials is essential to their development. Programs, traditionally instructed using didactic methods, are not effective for today's trainees. Most programs never have 100% expertise and teaching mastery across all topics from their faculty. So, integrating national curriculum, that enables trainees to objectively self-assess and personalize their learning to achieve mastery where they need it most, will elevate your program to the forefront.

### Knowledge to Practice (K2P) for Training Programs

Knowledge to Practice offers cardiology fellowship leaders and faculty a comprehensive training program solution that supplements and enhances their curriculum to guide trainee clinical knowledge and judgement. The K2P solution delivers insights into knowledge and skill mastery with national curriculum you can easily integrate into your curriculum for the length of a training program. You can provide trainees with a personalized, easy-to-use learning experience that increases knowledge in less time.

**74% more learning**

Increase in knowledge using K2P Adult Learning Theory approach over traditional methods

**76% faster learning**

Gain the same knowledge in only one-quarter of the time

---

### ▶ Know Where Your Fellows Stand

The K2P Insight Dashboard (ID) enables program leaders by providing:

- Assessment and competency data of trainees across clinical areas
- Visibility of trainee engagement with the curriculum
- Metrics on mastery of clinical content to guide curriculum and faculty development

### ▶ Teach with the Latest Content

Our latest clinical content helps you to teach trainees more effectively and efficiently.

- Latest, unbiased content of evidence-based and emerging medicine
- Content by renowned experts
- Current teaching techniques to help faculty connect with and instruct trainees

### ▶ Learn More in Less Time

K2P Adult Learning Theory (ALT) approach uses adaptive learning that tailors clinical content to an individual's needs and areas for improvement.

- Designed for millennial learning behavior
- Micro-learning modules in multiple media formats
- Personalized, competency-based learning plan
- Accessible on any device, anytime, anywhere

# FEATURES

## Comprehensive Clinical Content

### ▶ For Current Fellows

- Cardiovascular Updates: Comprehensive curriculum in general cardiology
- Echocardiography Updates: Comprehensive curriculum in echocardiography
- CurrentMD™ Cardiology: Treatments and guidelines in emerging medicine from top academic cardiologists
- Electrophysiology Board Review: Comprehensive review course in cardiac electrophysiology
- Interventional Cardiology Board Review: Comprehensive review course in interventional cardiology

### ▶ For Incoming and Outgoing Fellows

- Internal Medicine Board Review: Comprehensive course in internal medicine to prepare for IM boards
- Cardiovascular Board Review: Comprehensive course in general cardiology to prepare for CV boards

### ▶ For Faculty

- CurrentMD™ Cardiology: Treatments and guidelines in emerging medicine from top academic cardiologists

## Personalized Learning

- Competency assessment that tailors learning plan to an individual
- Perfect tracking tool between ITEs to monitor improvements
- Content in short modules proven to maximize learning and minimize time

## K2P Insight Dashboard

- Visibility into individual, program year, or entire program's progress
- Progress towards level of knowledge for specific or entire curriculum
- Data to support areas for subsequent faculty improvement
- Frequency at which trainees engage with learning

## Service and Support

- Training and setup session for Insight Dashboard and administration
- Regular client success check-ins and learner/admin technical support

## Customized Curriculum and Clinician Educator Training

- Adult-learning expertise and services to customize your content
- Online clinician educator track (K2P Academy) for trainees to familiarize in the art of adult learning as it applies to becoming a clinician educator

> "What I'm loving about this dashboard… is that I can check improvement…..it tells me they are getting smarter. For me, that's hard to beat."
> – M. Martinez, MD, Program Director

## About K2P

Knowledge to Practice (K2P) is a provider of online competency assessment, clinical content, and analytics solutions that help physicians, hospitals, and healthcare systems to transform patient care, deliver continuity of care, and mitigate risks. With K2P, our clients are able to elevate the knowledge mastery of their clinical teams, improve their practice of medicine with the latest clinical content and learning methods, and improve clinical outcomes.
